

T75-FIG-M01 Main Text

Frozen T24 four-scenario ranking summary

Upstream IDs: T74-TBL-01, T74-FIG-01 Lower final LER is better Frozen-set mock-backed software-HIL only

● Hybrid Residual-B

● UKF runner-up

T74-TBL-01 remains the authoritative numeric source.

Boundary note: publication-facing compression of T74-TBL-01 only.
Do not retell it as expanded benchmark, default-env runtime, .tflite ranking, or real-board evidence.

T75-FIG-M02 Main Text

Bounded six-seed mechanism / intervention view

Upstream IDs: T74-FIG-02, T74-TBL-03 Descriptive only No causal closure

quiet seed

classic seed

universal seed

harmful intervention

mixed / no clear effect

helpful intervention

Panel A. Baseline gap: mean(Gated v5) - mean(Full)

Negative values mean Gated v5 performs better than Full.

Panel B. Lower-clip I1 delta: mean(I1) - baseline

Positive values mean the intervention is worse than the original baseline.

Boundary note: this figure is descriptive only and supports a bounded mechanism/intervention reading. Do not author it as causal proof, intervention success proof, or teacher-side necessity proof.

T75-FIG-A01 Appendix

Layered boundary map for deployment-adjacent evidence

Upstream IDs: T74-FIG-03, T74-TBL-05, T74-TBL-06, T74-SUP-03, T74-SUP-04 T74-FIG-04 stays blocked

Layer 1. Frozen simulation / material mainline

T24 frozen ranking, FR6/FR7 bounded mechanism evidence, and T50 material reproducibility boundary.
Supported wording: frozen-set result, bounded explanatory layer, canonical material chain.
Not supported: expanded benchmark, runtime closure, board-level validation.

does not auto-upgrade

Layer 2. Isolated true .tflite runtime lane

T48: selected preserved float/int8 artifacts execute in an isolated current-host interpreter.
Supported wording: isolated current-host true runtime only.
Not supported: default-env recovery, HIL closure, deployment closure.

still not a board-success claim

Layer 3. Read-only real-board gate / provenance lane

T49/T71/T72: replay, regeneration, and provenance hardening all retain current-host NO_GO.
Not supported: real-board execution success, hardware validation, P3 real-board HIL complete.

Boundary note: appendix-only explanation of where the current evidence layers stop. It is not a deployment-success or portability-closure figure.

Blocked slot

T74-FIG-04

Unified portability / deployment closure figure

This slot remains blocked.
T75 must not author it into existence.

Reason:
the runtime lane is isolated-current-host only, and the real-board lane remains NO_GO.

Appendix authoring role

Explain where the evidence layers stop.
Do not compress them into a success narrative.

T76-PREVIEW-CS01 CONTACT-SHEET

Rendered-preview bundle for T76 QA only; not an upgraded evidence artifact.

T76 Rendered Figure QA Contact Sheet

Do not render previews from T76 SUP assets. Use for notes facing legibility QA only.

T76-PREVIEW-M01 T75-FIG-M01

T75-FIG-M01 Main Text

Frozen T24 four-scenario ranking summary

Upstream IDs: T74-TBL-01, T74-FIG-01 Lower final LER is better Frozen-set mock-backed software-HIL only

Boundary note: publication-facing compression of T74-TBL-01 only. Do not render it as expanded benchmark, default-env runtime, after ranking, or real-board evidence.

T76-PREVIEW-M02 T75-FIG-M02

T75-FIG-M02 Main Text

Bounded six-seed mechanism / intervention view

Upstream IDs: T74-FIG-02, T74-TBL-03 Descriptive only No causal closure

Boundary note: this figure is descriptive only and supports a bounded mechanism/intervention reading. Do not author it as causal proof, intervention success proof, or teacher-side necessity proof.

T76-PREVIEW-A01 T75-FIG-A01

T75-FIG-A01 Appendix

Layered boundary map for deployment-adjacent evidence

Upstream IDs: T74-FIG-03, T74-TBL-05, T74-TBL-06, T74-SUP-03, T74-SUP-04 T74-FIG-04 stays blocked

QA focus

1. No clipping in labels, notes, or captions.
2. Legends and zero-lines remain readable in grayscale.
3. Boundary wording still preserves T48 isolated-host and T72 NO_GO limits.
4. M01 stays visually subordinate to T74-TBL-01 for authoritative numerics.
5. A01 remains appendix-only boundary schematic, not closure evidence.
